

## UNIVERSITY OF OREGON

Oct 19, 1989

Dr. C. Darkins

It is my pleasure to inform you that your theses/dissertation has been selected for publication on microfiche by Microform Publications. Each year (in cooperation with AAHPERD Completed Research) more than 450 abstracts of graduate studies completed at North American universities in the allied fields of physical education, sport sciences, health, recreation, leisure studies, and dance are reviewed by a selection committee for possible publication. Approximately 220 of these are chosen on the basis of quality and topical interest for inclusion in the Microform collection.

Microform Publications is a non-profit, service component of the College of Human Development and Performance at the University of Oregon. It was organized in 1948 to provide a means for national and international dissemination of graduate theses/dissertations in the fields of physical education (and its sub-disciplines), sport sciences, health, recreation, leisure studies, and dance. Full text microfiche copies of recently completed theses/dissertations are distributed to 147 subscribing universities in North America, Europe, and Australia. In addition, requests for such information are received and processed for students and researchers as well, literally throughout the world. Your cooperation in this information distribution service helps provide greater access to current graduate research, thus promoting the spread of knowledge and understanding in our allied fields.

As you will notice, your university has given institutional approval of participation in this information dissemination effort on the enclosed permission form. Please give your approval by signing under author's approval and returning this permission form along with a clear copy of your thesis/dissertation for duplication to Microform Publications, 1479 Moss Street, Eugene, OR 97403. After microfiching it will be returned to you promptly with a complimentary microfiche copy of the study. There are no costs involved for your participation in this service other than sending the study (book rate).

Thank you for your assistance in enabling us to provide this important service. I look forward to receiving your study and the permission form at your earliest convenience. If you have any questions about Microform Publications, please do not hesitate to call or write.

Kind regards,

Gwen Steigelman, Ph.D.  
Director
